About the GE Global Innovation Barometer

Now in its fourth edition and spanning across 26 countries, the GE Global Innovation Barometer is an international opinion survey of senior business executives, all actively engaged in the management of their firm's innovation strategy.

The survey is conducted by Edelman Berland a consulting and research company on behalf of GE. The Barometer explores how the perception of innovation is changing in a complex, globalized environment.

It examines the way business executives around the world appreciate the framework for innovation their country has developed, it also details the perspective from business on the most efficient policies to support Innovation.

Finally it adopts a firm centric approach to better understand the way international businesses adapt their innovation practices and strategies in a challenging economic environment.
Sample and fieldwork details

3,209 phone interviews (in local languages)

Interview average duration: 35-40 minutes

Period: April 2\textsuperscript{nd} to May 30\textsuperscript{th} 2014

All respondents directly involved in the innovation strategy or process within their company. (31% C-Level,).

28% of companies operate globally, average company size is 650 employees

Average age of respondent is 44 years old
A comprehensive assessment of innovation

1. The ideal innovation process
   *Today’s Drivers & Barriers*

   Is the ideal innovation process...
   - Planned or spontaneous?
   - Integrated or autonomous?
   - Internal or collaborative?
   - Protective or offensive?
   - Local or global

   What are the drivers and barriers of successful innovation...
   - In general?
   - In your company?

   The future of innovation in specific sectors:
   - The best type of innovation to drive the quality of healthcare
   - The ability of innovation to solve today’s and tomorrow’s energy challenges

2. Countries & Public policies
   *State of the National Innovation Framework*

   Which country is the leading innovation champion?

   What does your country do well?
   - Cross-disciplinary research? Effective IP system? Private funding?

   What do the Public Authorities in your country do well, or less well?
   - Sufficient support to SMEs? To larger companies?
   - Adequate budget allocation?

   Public policies — your country’s priorities should be:
   - IP protection?
   - Curriculum and talent management?
   - Relationship between public / private sectors?
   - To lead innovation through public procurement’s decisions?

3. Innovation trends & practices
   *Myths & Realities*

   Familiarity, relevance, readiness for your company:
   - Convergence of technology
   - Collaboration
   - Industrial internet
   - Big data

   The impact of the Industrial internet...
   - On the job market
   - On energy consumption and dependency
   - Leading the new Industrial Revolution

   Big data, data sciences and analytics: buzz word or ...
   - A critical priority?
   - A source of internal power/influence?
   - A rewarding investment?
Macro findings

Mexican executives perceive innovation as a positive force with 77% agreeing that people in their country live better today than 10 years ago because of the impact of innovation – in line with the global average (80%).

90% of executives in Mexico agree that innovation is increasingly becoming a global game, merging and combining talents, ideas, insights and resources across the world is the only way to be successfully innovative – above the global average (82%).

Regarding collaboration, Mexican executives are more inclined than the global average in saying that despite the risks associated with collaboration and IP infringements, collaboration is a risk worth taking if you want to successfully innovate nowadays (85% compared to 77% global average) displaying a high agreement rate.

Executives in Mexico are recognising the value of collaboration with 68% of executives reporting that the revenue generated by collaborative innovation activities has been growing over the last year, in line with the global average of 64%. This is a 9-point increase compared to 2013 (59%).

35% of Mexican executives perceive smaller businesses such as SMEs and start-ups as driving innovation in Mexico – slightly below the global average (41%). They are followed by multinationals (25%), above the global average (19%).
Macro findings

Mexican executives highlight several priorities that their companies need to master to innovate successfully. The necessity of attracting and retaining the most talented comes in as a clear priority being mentioned by 97% of executives in Mexico – significantly higher than both last year (88%) and the global average of 79%. The second crucial ability is to understand customers and anticipate market evolutions (95%), an ability consistently important for executives in the country compared to 2013 (94%) – it is also above the global average (84%).

When asked about their company performance against these necessary abilities, 35% of executives thought their company performed extremely well at retaining new talent and 48% said that their company performed extremely well at understanding the needs of customers.

The critical challenges faced by companies in Mexico limiting their ability to innovate are the incapacity to scale up successful innovations to a wider or international market (40%) and the lack of sufficient financial support (30%) – both above the global average 24% and 23% respectively. The lack of internal support from leadership team / top management to support new ideas and make them profitable comes in third and is mentioned by 24% of executives – above the global average (19%).
Macro findings

Internal organisation – how businesses in Mexico go about innovating

87% of executives in Mexico recognise the need for companies to encourage creative behaviours and disruptive processes in the business in order to be able to innovate successfully – well above the global average (64%).

89% of executives believe that when innovating, it is best to protect the core business’ profitability as much as possible so as to support research & innovation efforts compared to 11% that say it is best not to worry about the potential short term negative impact on the core business’ revenue – a more protective-oriented result than the global agreement of 72% for protecting the core business’ profitability.

Mexican executives are a little more inclined (74%) than other executives globally to think that the most successful innovations are planned, emerging through a structured innovation process compared to 26% who say they are spontaneous, emerging through the interactions of creative individuals, compared with 62% and 38% global average respectively.

In terms of organizational design, 61% say it is best to position innovative teams and activities inside the existing lines of businesses and structured teams – lower than the global average of 68% while 39% believe innovative teams and activities should be placed outside in specialized and dedicated innovation /research centres – higher than the global average (32%).

47%, of Mexican executives say it is best to get to market as quickly as possible to keep an edge on competition (in line with the global average of 50%), and 53% say they prefer not to rush and take all the time needed to perfect the innovation (also in line with the global average – 50%).
Macro findings

The appreciation of predictive analytics in Mexico is much higher than for other executives globally with 87% saying that to use analytics and predictive knowledge is a crucial ability compared with 53% globally.

36% of Mexican executives say they have never heard of big data before and 4% say that big data is more of a buzz word than a reality – in line with the global average (6%). 26% of Mexican executives report that their company is either totally or quite prepared to make the most out of big data compared to 25% global average. Only 12% say they have not increased their ability to analyze large and complex amounts of data over the last year and won’t (compared to 29% global average).

Concerning the industrial internet, 32% of executives in Mexico say they have never heard of the industrial internet compared to a global average of 44%. A large majority, 63% believe the industrial internet will have a positive or neutral impact on the job market, well above the global average (49%). 5% of executives in Mexico believe their business is already totally prepared with a strategy or process to make the most of industrial internet – in line with the global average (6%).
Macro findings

Mexico’s framework for innovation is perceived as being quite challenging by executives from other markets with 14% saying that Mexico has developed a framework conducive to innovation. Mexican executives’ self-evaluation of their overall framework for innovation has remained stable since last year, with 50% reporting Mexico has developed an innovation-conducive environment this year compared to 48% 18 months ago.

Regarding the perception of the efficiency of government support for innovation only 23% of executives agree that government support for innovation is efficiently organised, below the global average (40%).

When it comes to the priorities for government to tackle, executives in Mexico are aligned with executives globally. 93% call for government to better align students’ curricula with the needs of business; 92% would like to facilitate research cooperation with other countries; 91% would like to see a better protection of business confidentiality and trade secrets; and 90% would like to see fight bureaucracy and red tape for companies willing to access funds and incentives allocated to innovation.

Public authorities’ financial support towards innovative companies is seen as insufficient and is below the global average (47%), with only 30% agreeing that government and public authorities allocate an adequate share of their budget to support innovative companies. 63% of executives in Mexico highlight an insufficient support to SMEs, in line with the global average of 61%.

76% of executives in Mexico think the best policy would be to give subsidies/preferences to both local and international businesses willing to bring innovative solutions to their market – this is significantly higher than the global average of 51% whilst 19% are more in favour of giving subsidies/preferences to local business only to favour the development of local solutions, below the global average (29%).

Under-indexes compared to global average
Global findings
Collaboration is already embraced and delivering positive results, the risk is worth taking.

Convergence of technology and big data are more than buzz words, they become a reality but create implementation challenges.

Firms broadly boosted their analytics capabilities but a small majority have leveraged the predictive dimension of Big data. Those who did recognized the value it added to their innovation process and the influence it conferred data scientists in their organization.

Awareness of the Industrial Internet is significant, but the concept still needs to demonstrate its true revolutionary nature. High tech, Telecom and Energy industries have already prepared to embrace the revolution, Manufacturing and Healthcare slower to adopt.

The debate around the impact of Industrial internet on the job market is not settled, but a majority reject the hypothesis of a net negative impact on employment.
Increasingly Innovation is about finding the right talent, partners, resources, ideas and insight on a global scale.

Constraints in emerging markets can be converted into opportunities, even if some interesting differences emerge on this notion.

The focus on local needs and specificities is being recognized.

In most emerging economies, multinational companies drive Innovation much more prominently than local governments or academia, and more so than local business.

The GloCal nature of Innovation is becoming table-stake, the innovation playground knows no borders.

Infrastructure challenges of emerging economies don’t stop innovative businesses, even if scaling up is a clear issue for them.
To maximize the potential of this new environment, business leaders need to make some « tough calls ».

Innovation is disrupting the business status-quo, business leaders face uneasy trade-offs.

The need for disruption in processes and behaviors is established as a criterion for success.

But business leaders are still very much focused on short term profitability.

And struggle to adopt more spontaneous, creative and interactive innovation models.

More traditional organizational design attached to Innovation activities remain the norm.
Internal agility and speed clearly identified as prerequisites to Innovation success

“Fast works” related concepts are getting traction, but old reflexes are hard to shake-off

Internal inertia is identified as a strong « innovation killer »

How to foster an environment fully ready for disruptive and radical innovation is a key challenge

The ability to adopt and implement emerging technologies fast is clearly identified as a business driver and competitive advantage, but only a few excel at it

The acceleration of the go-to market process (test fast, fail fast, pivot fast) is embraced by half of Innovation executives, but still generate considerable nervousness
The difficulty to scale up Innovative business is the number one “Innovation killer”

How to articulate revenue streams coming from innovative activities and more core business operations is challenging. Only a minority of respondents are ready to risk disrupting current profit streams to enable innovative business to grow.

How to fund innovation aggressively both from public and private sources is a challenge, due to internal and external factors.

Deciding where best to embed and integrate the new functions and external partners can have important consequences on the operations and on the culture of the firm.

Designing effective and sustainable business models lays at the very core of innovation executives’ concerns and priorities.

Managing collaboration, articulating revenue streams, funding innovation activities and finding them a « home » in the company are identified as focus areas.
What are business leaders’ expectations regarding the role of government and public authorities?

Provide a conducive Innovation framework, set the right incentives for Innovation, invest in talent, support SMEs and harness the power of multinationals

Governments have to provide the right framework for Innovation (IP protection, minimal red tape and bureaucracy, public private partnership)

They should also harness the power of public procurement to support innovation and manage subsidies carefully

They should make sure they prepare and give access to the talent pool needed to innovate better

They should focus innovation incentives on the value created beyond geographic or national considerations

They should amplify the support to Innovative SMEs and at the same time capitalize on the drive Multinationals can bring to their Innovation landscape
Country specifics, there is no one size fits all model for Innovation

Innovation champions like USA and Germany, display contrasted perceptions and priorities. Emerging economies are not a consistent block, Asia emerging markets doing more positively than African markets.

The efficacy of government support to Innovation is increasingly contrasted (Singapore, UAE, China and KSA still and even more leading on this indicator than before, USA is stable at a low level of satisfaction)

USA confirms and amplifies its status as a leader for Innovation (Innovation champion, and most innovation conducive environment) at least from a reputation standpoint (macro economic indicators providing a more contrasted picture).

South Korea, Singapore, India are less perceived as innovation-friendly environments by the Global community.
The Energy industry is facing multiple challenges, but driving economic growth through new and more sustainable sources of energy is identified as the absolute priority. The contribution from energy to broader economic growth is identified as the number one challenge. The reduction of the environmental impact of energy and the diversification of the energy mix comes second. The rising role of analytics in helping the industry become more efficient is recognized but less prominent in energy respondents’ opinion.

Technical and medical innovation such as imaging devices and diagnosis tools are expected to drive the most progress in quality of healthcare. This is the first driver identified by Healthcare industry respondents. Scientific innovation and especially applied genetic science to diagnostic are also very high in the ranking. Policy innovation (awareness campaigns, early detection of diseases) is also expected to play a leading role.
Detailed findings
Innovation executives are acutely aware that powerful trends are at work that will change the business environment.

Collaboration, convergence, Industrial Internet, Data-analytics change(d) the way business are innovating.

Collaboration is already embraced and delivering positive results, the risk is worth taking.

Convergence of technology and big data are more than buzz words, they become a reality but create implementation challenges.

Firms broadly boosted their analytics capabilities but a small majority have leveraged the predictive dimension of Big data. Those who did recognize the value it added to their innovation process and the influence it conferred data scientists in their organization.

Awareness of the Industrial Internet is significant, but the concept still needs to demonstrate its true revolutionary nature. High tech, Telecom and Energy industries have already prepared to embrace the revolution, Manufacturing and Healthcare slower to adopt.

The debate around the impact of Industrial internet on the job market is not settled, but a majority reject the hypothesis of a net negative impact on employment.
Innovation is acknowledged as a driver of general improvement in countries. But some executives sense a scepticism amongst their national public opinion about the impact of technological innovation on inequalities.

"People in my country live better today than 10 years ago because of the impact of innovation on their life and on our country."

"There is a strong fear that technological innovation will increase inequalities."

The country is under-indexing compared to the global average.
The apprehension of the impact of technological innovation on inequalities varies across countries.

"THERE IS A STRONG FEAR THAT TECHNOLOGICAL INNOVATION WILL INCREASE INEQUALITIES"

Q10.4. Thinking about your country in particular, how far do you agree with the following statements? There is a strong fear that technological innovation will increase inequalities. Base: Country results N=100–300 per market / Mexico results N=100
A new Industrial Revolution? Split perceptions

“We are currently in a new Industrial Revolution at the meeting of hardware and software, a historical shift into the age of advanced manufacturing and industrial internet”

Q18-2. Now we are going to present different views on these emerging trends, we would like you to pick the one you feel is the truest or the most relevant. Base: Global results N= 3,209
Continuity for developed markets, a radical change for the emerging ones

“We are currently in a **new Industrial Revolution** at the meeting of hardware and software, a historical shift into the age of advanced manufacturing and industrial internet”

Q18-2. Now we are going to present different views on these emerging trends, we would like you to pick the one you feel is the truest or the most relevant. Base: Country results N= 100– 300 per market / Mexico results N=100
A multifaceted change, businesses are embracing by stages.

Q17. Is your business already equipped with a strategy or process to make the most of…
Base: Global results N= 3,209
External collaboration is now a reality, and demonstrates to be a profitable risk worth taking.

But this is a risk worth taking if you want to successfully innovate nowadays.

And this is why you company should avoid.

Q14. Which of these two statements is closer to your opinion? Q13. Which of the following apply in your company? Base: Global results N= 3,209 / Mexico results N=100

The country is over-indexing compared to the global average

The country is under-indexing compared to the global average

Collaborating with external business partners can put my business at risk as regard intellectual property and trade secrets...

The revenue and profit generated by collaborative innovation activities has been growing over the last year.

My company embraces open source innovation – involving external stakeholders such as entrepreneurs in the internal development of new ideas.

My company has already resorted to crowdsourcing soliciting contributions (ideas, content, investment, etc.) from a large and varied group of stakeholders for its innovation activities.
Collaboration, a reality in most markets

AND THE REVENUE AND PROFIT GENERATED BY COLLABORATIVE INNOVATION ACTIVITIES HAS BEEN GROWING OVER THE LAST YEAR

Q13. Which of the following apply in your company? YES Base: Country results N= 100–300 per market / Mexico results N=100

Less collaborative (under-index)

More collaborative (over-index)

Global average 64%

Collaboration, a reality in most markets

AND THE REVENUE AND PROFIT GENERATED BY COLLABORATIVE INNOVATION ACTIVITIES HAS BEEN GROWING OVER THE LAST YEAR

Q13. Which of the following apply in your company? YES Base: Country results N= 100–300 per market / Mexico results N=100

Global average 64%
Some countries have increased their collaboration effort even further than last year

AND THE REVENUE AND PROFIT GENERATED BY **COLLABORATIVE INNOVATION ACTIVITIES** HAS BEEN GROWING OVER THE LAST YEAR

Q13. Which of the following apply in your company? YES Base: Country results N= 100–300 per market / Mexico results N=100

The ability or willingness to embrace change varies with size of company.

The revenue and profit generated by **collaborative innovation activities** has been growing over the last year.

And similarly, **reinforcing IP** to encourage stronger collaboration between companies is critical especially for companies with 501 to 1,000 employees.

Q13-1. Which of the following apply in your company? (% Yes) & Q12-1. What are the main priorities your country should focus on to efficiently support innovation? (% critical priority)

Base: <100 employees N= 907; 101-500 employees N= 1045; 501-1,000 employees N=588; >1,000 employees N= 669
And it also varies by sector

- My company has already resorted to crowdsourcing
- My company embraces open source innovation

Q13-2&3. Which of the following apply in your company? Base: Sectors – Min n=140 – Max n=469

Professional services: 61%, 40%; High-tech / IT: 62%, 40%; Other: 67%, 37%; Industrial products: 60%, 37%; Energy: 58%, 36%; Healthcare: 64%, 35%; FMCG: 58%, 32%; Manufacturing: 58%, 31%; Electronics: 57%, 31%; Telecoms: 58%, 30%; Automotive: 52%, 30%
**Big data is not longer a buzz word**

Do you believe in the importance of data sciences and analytics in enabling innovation?

Q19. Do you believe in the importance of data sciences and analytics in enabling innovation? By “Data sciences and analytics”, also often referred to as “Big data”, we mean the ability for a company to use analytics to create strategic knowledge from large and complex datasets. Base: Global results N=3,209 / Mexico results N=100

The country is over-indexing compared to the global average

The country is under-indexing compared to the global average
But not all markets are familiar with Big data

Q15-3. Are you familiar with the following notions? Big data Base: Country results N= 100–300 per market / Mexico results N=100
Big Data, the reality:

**THE BUSINESS NEED**

- Most identify the need for predictive data
- 84% Believe it is critical to understand customers and anticipate market evolutions to innovate successfully

**THE SOLUTION**

- But only half identify Big Data as being the solution
- 53% Believe it is critical to use analytics and predictive knowledge to innovate successfully

**THE FACTS**

HAS YOUR COMPANY INCREASED ITS ABILITY TO ANALYZE LARGE AND COMPLEX AMOUNTS OF DATA OVER THE LAST YEAR?

- Yes: 47%
- Planning: 29%
- No: 24%
- No and we won’t

Q1-3 Q2-9 – innovation priorities, Base all n=3,209. Q21. Big data is / will be a real challenge for my company as it forces to allocate resources and budget at the expense of more traditional activities (e.g. marketing, insight, research, etc). Base Those which increased/planning to increase ability N= 1,851 //Q22/Has your company managed to make the most out of the data collected and convert this into added value for the innovation process? Base: Big Data users global N= 1,135 /20 bis/ Do data scientists, i.e. those who able to make sense of large amounts of data, have strong influence and authority in your company. Base Big data enabled companies N=721
The planning of increased analytical capabilities is polarising across countries

HAVE NOT INCREASED THEIR ABILITY TO ANALYZE LARGE AND COMPLEX AMOUNTS OF DATA OVER THE LAST YEAR AND WON’T

Q20. Has your company increased its ability to analyze large and complex amounts of data over the last year? (% Yes)
Base: Country results N= 100–300 per market / Mexico results N=100
Sectors with more advanced technical expertise or more structured sets of data lead the change, but better be a larger company

NUMBER OF COMPANIES WHICH HAVE **INCREASED ABILITY** TO ANALYZE LARGE AND COMPLEX AMOUNTS OF DATA OVER THE LAST YEAR?

Q20. Has your company increased its ability to analyze large and complex amounts of data over the last year? (% Yes) Base: Sectors – Min n=140 – Max n=469 / company size: <100 employees N= 907; 101-500 employees N= 1045; 501-1,000 employees N=588; >1,000 employees N= 669
Big Data, the reality:

And many dread the **challenge**/ impact of its implementation on the business model

61% of those who have made the move or are planning so, declare Big data is / will be a **real challenge** as it forces to allocate resources and budget at the expense of more traditional activities

Those experiencing increased data analytics capabilities see the **added value** Big Data brings into their innovation process

69% declare they made the most out of the data collected and converted it into added value for the innovation process

---

Q1-3 Q2-9 – innovation priorities, Base all n=3,209. Q21. Big data is / will be a real challenge for my company as it forces to allocate resources and budget at the expense of more traditional activities (e.g. marketing, insight, research, etc). Q17. Is your business already equipped with a strategy or process to make the most of...

Base: Global results N= 3,209 / Sectors – Min n=140 – Max n=469
Increasingly Innovation is about finding the right talent, partners, resources, ideas and insight on a global scale.

Constraints in emerging markets can be converted into opportunities, even if some interesting differences emerge on this notion.

The focus on local needs and specificities is being recognized.

In most emerging economies, multinational companies drive Innovation much more prominently than local governments or academia, and more so than local business.
Think “glocal”!

INNOVATION IS INCREASINGLY BECOMING A GLOBAL GAME, MERGING AND COMBINING TALENTS, IDEAS, INSIGHTS AND RESOURCES ACROSS THE WORLD IS THE ONLY WAY TO BE SUCCESSFULLY INNOVATIVE

MORE THAN EVER BEFORE, INNOVATION NEEDS TO BE LOCALIZED TO SERVE SPECIFIC MARKET NEEDS

Global 82%

37%

9%

1,000+ 79%
501-1,000 71%
101-500 73%
<100 74%

The country is over-indexing compared to the global average
The country is under-indexing compared to the global average
No consensus amongst emerging countries

The constraints experienced by some emerging countries create innovation opportunities for companies, willing to invest in overcoming them.
WHO IS DRIVING INNOVATION THE MOST TODAY IN YOUR COUNTRY?

- More multinationals
- Both equally
- More large national companies

Q7. Who do you think is driving innovation the most today in your country? Base: Country results N= 100–300 per market / Mexico results N=100
The business fabric of innovation varies across countries, each picking a combination of business types to lead it.

Q7. Who do you think is driving innovation the most today in your country? Based on businesses for which a country over-indexes compared to global average. Base: Country results N=100–300 per market / Mexico results N=100.

- **Public organisations** mostly Singapore, Turkey, Algeria.
- **Public organisations & Multinationals** Malaysia, UAE/KSA, Kenya, Mexico.
- **Multinationals** mostly Nigeria.
- **Large national companies mostly** South Korea.
- **Large national companies & Multinationals** Brazil, India.
- **Smaller businesses & Multinationals** Australia/Indonesia.
- **Smaller businesses & Large national companies** Germany, Japan, Canada.
- **Smaller businesses** & Public organisations China, UK.
- **Smaller businesses mostly** US, Sweden, Italy, Israel, South Africa, Poland.
To maximize the potential of this new environment business leaders need to make some « tough calls »

Innovation is disrupting the business status-quo, business leaders face uneasy trade-offs

The need for disruption in processes and behaviors is established as a criterion for success

But business leaders are still very much focused on short term profitability...

...And struggle to adopt more spontaneous, creative and interactive innovation models

More traditional organizational design attached to Innovation activities remain the norm
Being truly innovative is a challenge, requiring to change mind-sets, behaviours and processes. Disrupt!

64% agree that to be successful when innovating, companies must encourage creative behaviours and disruptive processes in the business, especially:

- 70% in the Healthcare sector Vs. 64% in all other sectors
- 67% Amongst those that already collaborate Vs. 60% for those who don’t
- 68% Amongst those already use open sources Vs. 60% for those who don’t
- 69% Amongst those already use big data Vs. 63% for those who don’t

Very consistently across audience, 59% consider the difficulty to come up with radical and disruptive ideas as a key challenge killing your business’s ability to innovate efficiently, independently from the profile of their company.
Emerging countries are the most open to disrupt their internal business model

Q5-1. Do you consider any of the following as key challenges killing your business’s ability to innovate efficiently? Q1_5.

Thinking about how companies manage innovation, how important are the following for a company to be able to innovate successfully? (Grades from 8 to 10)

Base: Country results N= 100–300 per market / Mexico results N=100
But behind good “disruptive” intentions, most prefer to stick to well-established and more conservative practices and processes.

**When innovating, it is best..**

- To **protect the core business’ profitability** as much as possible, so to support research & innovation efforts: 72%
- Not to worry about the potential short term negative impact on the core business’ revenue: 28%

**The most successful innovations are**

- **Planned**, emerging through a structured innovation process: 62%
- **Spontaneous**, emerging through the interactions of creative individuals: 38%

---

Q4-1&2. Now we are going to present different views on the ideal innovation process, we would like you to pick the one you feel is the truest or the most relevant in driving successful innovation. Base: Global results N= 3,209 / Mexico results N=100
Some markets are more disruptive than others regarding the ideal innovation process, but the large majority agrees on the importance to protect the core business' profitability.

THE MOST SUCCESSFUL INNOVATIONS ARE PLANNED, EMERGING THROUGH A STRUCTURED INNOVATION PROCESS

WHEN INNOVATING, IT IS BEST TO PROTECT THE CORE BUSINESS' PROFITABILITY AS MUCH AS POSSIBLE, SO TO SUPPORT RESEARCH & INNOVATION EFFORTS

Q4-1&2. Now we are going to present different views on the ideal innovation process, we would like you to pick the one you feel is the truest or the most relevant in driving successful innovation. Base: Country results N=100–300 per market / Mexico results N=100
Internal agility and speed clearly identified as pre-requisites to Innovation success

“*Fast works*” related concepts are getting traction, but old reflexes are hard to shake-off

Internal inertia is identified a strong « innovation killer »

How to foster an environment fully ready for disruptive and radical innovation is a key challenge

The ability to adopt and implement emerging technologies fast is clearly identified as a business driver and competitive advantage, but only a few excel at it

The acceleration of the go-to market process (test fast, fail fast, pivot fast) is embraced by half of Innovation executives, but still generate considerable nervousness.
There is a strong consensus on the need for internal agility, and the difficulty of achieving it

67% agree that to be successful when innovating, companies must quickly adapt and implement emerging technologies.

57% consider the internal inertia and the incapacity to be nimble, failing at rapidly converting ideas into actions is a challenge limiting their business’s ability to innovate efficiently.

Internal inertia is a key critical challenge killing their business’s ability to innovate efficiently.

- To attract investors to fund innovative programs: 41% (+7 pts)

Q1/Q2. How important do you think the following elements are for a company to be able to innovate successfully? (Grades from 8 to 10)
Base: Global results N= 3,209
Identifying future opportunity is a core priority for all

TO UNDERSTAND CUSTOMERS AND ANTICIPATE MARKET EVOLUTIONS

Q1/Q2... How important do you think the following elements are for a company to be able to innovate successfully? (Grades from 8 to 10)

Base: Country results N= 100–300 per market / Mexico results N=100

NEW markets 2014

- 2013
- 2014
In many countries, the need for talent is becoming even more strategic

TO ATTRACT AND RETAIN THE MOST TALENTED AND SKILLED INDIVIDUALS

Q1/Q2.. How important do you think the following elements are for a company to be able to innovate successfully? (Grades from 8 to 10)

Base: Country results N= 100–300 per market / Mexico results N=100

innovate successfully
Less of a consensus on how best to council longer and shorter terms requirements

TO PRIORITIZE LONGER TERM INNOVATION GOALS OVER SHORTER TERM FINANCIAL OBJECTIVES

Q1/Q2. How important do you think the following elements are for a company to be able to innovate successfully? (Grades from 8 to 10)
Base: Country results N= 100–300 per market / Mexico results N=100

innovate successfully?
More businesses rely on internal funds in emerging markets

TO ALLOCATE AND SECURE A SPECIFIC BUDGET FOR INNOVATION ACTIVITIES

Q1/Q2. How important do you think the following elements are for a company to be able to innovate successfully? (Grades from 8 to 10)

Base: Country results N= 100–300 per market; Mexico results N= 100
Attracting investors, still key in emerging markets

Q1/Q2. How important do you think the following elements are for a company to be able to **innovate successfully**? (Grades from 8 to 10)

Base: Country results N= 100–300 per market / Mexico results N=100
The difficulty to scale up Innovative business is the number one “Innovation killer”

How to articulate revenue streams coming from innovative activities and more core business operations is challenging. Only a minority of respondents are ready to risk disrupting current profit streams to enable innovative business to grow

How to fund innovation aggressively both from public and private sources is a challenge, both because of internal and external factors

Deciding where best to embed and integrate the new functions and external partners can have important consequences on the operations and on the culture of the firm
The difficulty to define an effective business model to support new ideas and make them profitable is a challenge killing the ability to innovate for 60%
Some markets express a stronger need to define a new business model to support successful innovation

THE DIFFICULTY TO DEFINE AN EFFECTIVE BUSINESS MODEL TO SUPPORT NEW IDEAS AND MAKE THEM PROFITABLE IS A CHALLENGE KILLING THE ABILITY TO INNOVATE

Q5-2. Do you consider any of the following as key challenges killing your business’s ability to innovate efficiently?

Base: Country results N= 100–300 per market / Mexico results N=100
Businesses face many challenges limiting their ability to lead more radical and larger scale innovation

Q5. Do you consider any of the following as key challenges killing your business’s ability to innovate efficiently? Base: Global results N= 3,209
**Q5. Do you consider any of the following as key challenges killing your business’s ability to innovate efficiently?**

Q1/Q2. How important do you think the following elements are for a company to be able to "innovate successfully"? Base: Mexico results N=100
Q3. To what extent does your company currently perform against these success criteria? Based on those who said it was a critical factor (8-10).
Q1/Q2. How important do you think the following elements are for a company to be able to innovate successfully? Base: Global results N= 3,209
Q3. To what extent does your company currently perform against these success criteria? Based on those who said it was a critical factor (8-10)
Overall, a consolidated support from private investors

PRIVATE INVESTORS ARE SUPPORTIVE OF COMPANIES THAT NEED FUNDS TO INNOVATE

Has improved

Unchanged

Has worsened

Q10-1. Thinking about your country in particular, how far do you agree with the following statements? Private investors are supportive of companies that need funds to innovate. Results for top 2 boxes (somewhat agree + totally agree). Base: Country results N= 100–300 per market / Mexico results N=100.
Even if disruption is accepted in theory, most prefer to stick to well-established and more conservative practices and processes.

**When innovating, it is best:**

- 72% To protect the core business' profitability as much as possible, so to support research & innovation efforts
- 28% Not to worry about the potential short term negative impact on the core business' revenue

**The most successful innovations are:**

- 62% Planned, emerging through a structured innovation process
- 38% Spontaneous, emerging through the interactions of creative individuals

**Mexico results vs global average:**

- The country is over-indexing compared to the global average
- The country is under-indexing compared to the global average

Q4. Now we are going to present different views on the ideal innovation process, we would like you to pick the one you feel is the truest or the most relevant in driving successful innovation. Base: Global results N= 3,209 / Mexico results N=100
Positioning innovative teams and activities inside the business is the dominant model, only High-tech and IT companies tend to be more open to an outside model.

In terms of organizational design, it is best to position innovative teams and activities **Inside** the existing lines of business and structured teams, with 68% inside and 32% outside.

Q4-3. Now we are going to present different views on the ideal innovation process, we would like you to pick the one you feel is the truest or the most relevant in driving successful innovation. Base: Global results N=3,209 / Mexico results N=100 / Base: Global – sectors N= min 140 (Telecomms) max 469 (Manufacturers)

**Outside** in a specialized and dedicated innovation / research centres:
- High-tech / IT: 38%
- Healthcare: 36%
- Electronics: 33%
- FMCG: 33%
- Other: 32%
- Automotive: 32%
- Manufacturing: 31%
- Professional services: 30%
- Telecoms: 30%
- Energy: 30%
- Industrial products: 26%

**Global average**: 32%

The country is over-indexing compared to the global average (39%) and the country is under-indexing compared to the global average (32%).
Apart from Japan, the majority of innovative executives prefer to keep innovative teams and activities inside the existing lines of business. However, some are less closed than others to externalization.

IN TERMS OF ORGANIZATIONAL DESIGN, IT IS BEST TO POSITION INNOVATIVE TEAMS AND ACTIVITIES OUTSIDE IN A SPECIALIZED AND DEDICATED INNOVATION /RESEARCH CENTRES.

Q4-3. Now we are going to present different views on the ideal innovation process. We would like you to pick the one you feel is the truest or the most relevant in driving successful innovation. Base: Country results N= 100–300 per market / Mexico results N=100.
Governments have to provide the right framework for Innovation (IP protection, minimal red tape and bureaucracy, public private partnership)

They should also harness the power of public procurement to support innovation and manage subsidies carefully

They should make sure they prepare and give access to the talent pool needed to innovate better

They should focus innovation incentives on the value created beyond geographic or national considerations

They should amplify the support to Innovative SMEs and at the same time capitalize on the drive Multinationals can bring to their Innovation landscape

What are business leaders’ expectations regarding the role of government and public authorities?

Provide a conducive Innovation framework, set the right incentives for Innovation, invest in talent, support SMEs and harness the power of multinationals
Innovation executives expect Public Authorities to improve the overall innovation framework of their country.

- **Fight bureaucracy** and red tape for companies willing to access funds and incentives allocated to innovation.
- Ensure that **business confidentiality** and **trade secrets** are adequately protected.
- Better align **students curricula** with the needs of business.
- Facilitate **research cooperation** with other countries.
- Actively promote **partnerships** between the **public** and **private** sectors.
- **Reinforce IP** to encourage stronger collaboration between companies.
- Encourage the **collaboration** of private companies with **SoEs**.
- Ensure **public procurement** leads the **early adoption** of major innovations.
- Evaluate the impact some of its **local content requirement** and **regulatory policies**.
- Ensure **public procurement** always **favor** the most innovative solutions even if they come from foreign countries.
- Encourage and ease the **hiring of talented foreign citizens**.

Q12. What are the main priorities your country should focus on to efficiently support innovation? Global average. Results for top 2 boxes (critical priority & important but not critical priority). Base: N= 3,209
Emerging markets put more pressure on policymakers to provide them with the framework they need to innovate successfully.

Innovation executives identify 4.1 priorities out of 12 as being critical to be addressed on average.

**Average number of critical priorities per country out of 12 priorities**

- Algeria: 6.0
- Kenya: 5.5
- South Africa: 5.4
- Mexico: 5.3
- Turkey: 5.2
- Poland: 5.1
- Brazil: 5.1
- Russia: 5.0
- Nigeria: 4.9
- China: 4.8
- KSA: 4.6
- Indonesia: 4.5
- Italy: 4.2
- Malaysia: 4.1
- India: 4.0
- Singapore: 3.8
- Germany: 3.5
- USA: 3.4
- UK: 3.3
- Australia: 3.3
- UAE: 3.2
- Canada: 3.1
- Israel: 2.7
- Sweden: 2.6
- Japan: 2.5
- South Korea: 2.4

Q12. What are the main priorities your country should focus on to efficiently support innovation? Average number of critical priorities per country out of 12.

Base: Country results N= 100–300 per market / Mexico results N=100
The efficiency of government support for innovation is variable

Q11-2. Thinking about the policies and actions undertaken in your country by the government and public authorities, how far do you agree with the following statements. Government support for innovation is efficiently organized. Results for top 2 boxes (somewhat agree + totally agree).

Base: Country results N= 100–300 per market / Mexico results N=100

GOVERNMENT SUPPORT FOR INNOVATION IS EFFICIENTLY ORGANIZED

NEW markets 2014
A strong priority: ensure that business confidentiality and trade secrets are adequately protected

ENSURE THAT BUSINESS CONFIDENTIALITY AND TRADE SECRETS ARE ADEQUATELY PROTECTED

Q12-8. What are the main priorities your country should focus on to efficiently support innovation? Ensure that business confidentiality and trade secrets are adequately protected. Results for top 2 boxes (critical priority & important but not critical priority).

Base: Country results N= 100–300 per market / Mexico results N=100
Talent management remains an essential priority

**Q12. What are the main priorities your country should focus on to efficiently support innovation? Average number of critical priorities per country out of 12.**

Base: Country results N= 100–300 per market / Mexico results N=100

---

**BETTER ALIGN STUDENTS CURRICULA WITH THE NEEDS OF BUSINESS**

- **Stable**
- **Decreased**

- **NEW markets 2014**
The financial support from governments and public authorities varies significantly across countries.

**GOVERNMENT AND PUBLIC AUTHORITIES ALLOCATE AN ADEQUATE SHARE OF THEIR BUDGET TO SUPPORT INNOVATIVE COMPANIES**

The bar chart shows the percentage of countries where government and public authorities allocate an adequate share of their budget to support innovative companies. The chart is divided into three categories: Improved, Stable, and Worsened.

**Q12. What are the main priorities your country should focus on to efficiently support innovation? Average number of critical priorities per country out of 12.**

Base: Country results N= 100–300 per market / Mexico results N=100

**NEW markets 2014**
Public Procurement is expected to adopt a first in class practices

Q12. What are the main priorities your country should focus on to efficiently support innovation? Global average. Results for top 2 boxes (critical priority & important but not critical priority). Base: N= 3,209

MAIN PRIORITIES COUNTRY SHOULD FOCUS ON TO EFFICIENTLY SUPPORT INNOVATION

**Lead**
To ensure public procurement leads the **early adoption** of major innovations is a critical priority for 76%

**Better regulate**
Evaluate the impact some of its **local content requirement** and regulatory policies 71%

**Be open**
To ensure public procurement always favor the most innovative solutions even if they come from **foreign countries** 70%
Nuances in expectations in regards to procurement

MAIN PRIORITIES COUNTRY SHOULD FOCUS ON TO EFFICIENTLY SUPPORT INNOVATION

To ensure public procurement...
- always favor the most innovative solutions even if they come from foreign countries
- leads the early adoption of major innovations is a critical priority for

Q12-10&11. What are the main priorities your country should focus on to efficiently support innovation? Global average. Results for top 2 boxes (critical priority & important but not critical priority). Base: Country results N=100–300 per market / Mexico results N=100
Public subsidies / preference are broadly accepted, but nationality bias are favoured by a minority

**WHAT DO YOU THINK IS THE BEST PUBLIC POLICY?**

Give subsidies/preferences to **local business only** to favor the development of local solutions

- **51%**
- [VALUE]
- [VALUE]

Subsidies and preferences are **not an effective way** to support innovation as they introduce strong bias and have only short term effects.

**Give subsidies/preferences to both local and international businesses willing to bring innovative solutions to the market**

Q4-6. Now we are going to present different views on the ideal innovation process, we would like you to pick the one you feel is the truest or the most relevant in driving successful innovation. Base: Global results N= 3,209

**Sectors**

- **More open to both**
  - Automotive 54%
  - Healthcare 55%
  - Energy 53%
  - High-tech / IT 53%

- **More local focus only**
  - Telecoms 38%
  - Other 34%
  - Electronics 32%
  - Professional services 29%

- **More rejectors**
  - Industrial products 22%
  - FMCG 22%
  - Manufacturing 21%
No consensus on the use of Public subsidies / preferences

- Give subsidies/preferences to both local and international businesses willing to bring innovative solutions to the market
- Subsidies and preferences are **not an effective way** to support innovation as they introduce strong bias and have only short term effects
- Give subsidies/preferences to local business only to favor the development of local solutions

In Germany, Indonesia and the US, the role for Public Subsidies is rejected by more than 1 in 3 Innovation executives.

Q4-6. Now we are going to present different views on the ideal innovation process. We would like you to pick the one you feel is the truest or the most relevant in driving successful innovation. Base: Country results N= 100–300 per market / Mexico results N=100
Governments’ support to SMEs is largely seen as currently insufficient

**Public Authorities do not support SME’s in their innovation efforts enough**

Base: N=3,209 / Mexico results N=100

Q11-3. Thinking about the policies and actions undertaken in your country by the government and public authorities, how far do you agree with the following statements. Public authorities do not support SME’s in their innovation efforts enough. Results for top 2 boxes (somewhat agree + totally agree).

Global average: 61%
Small is beautiful! SMEs, start-ups and individuals are seen as the innovation champions and the most promising collaboration partners.

WHO IS DRIVING INNOVATION THE MOST TODAY IN YOUR COUNTRY?

- 85% agree collaboration with start-up and entrepreneurs will drive innovation success in the future.

Q7. Who do you think are driving innovation the most today in your country?
Base: Global results N= 3,209
SME’s and start-ups are battling for the innovation champions title across countries

Who is driving innovation the most today in your country?

- SMEs
- Start-ups & Individuals
- Multinationals
- Large Enterprises headquartered in your country

Q7. Who do you think are driving innovation the most today in your country? Base: Country results N=100–300 per market / Mexico results N=100
Country specifics, there is no one size fits all model for Innovation

Innovation champions, like USA and Germany, display contrasted perceptions and priorities. Emerging economies are not a consistent block, Asian emerging markets are more positive than African markets.

The efficacy of government support to Innovation is increasingly contrasted (Singapore, UAE, China and KSA even more leading on this indicator than before, USA is stable at a low level of satisfaction).

USA confirms and amplifies its status as a leader for Innovation (Innovation champion, and most innovation conducive environment) at least from a reputation standpoint (macro economic indicators providing a more contrasted picture).

South Korea, Singapore, and India are less perceived as innovation-friendly environments by the Global community.
Understanding customers/markets and attracting / retaining talents are increasingly the top priority drivers of successful innovation

TO INNOVATE EFFICIENTLY AND SUCCESSFULLY, IT IS **CRITICAL** FOR COMPANIES…

The self-evaluation of the innovation framework in own country varies

Q9. For each of the following markets, how far would you say that they have developed an Innovation-conducive environment?

Note: % of respondents that have given a grade superior or equal to 7/10 to their own country

Base: Country results N= 100–300 per market / Mexico results N=100
The Energy industry is facing multiple challenges, but driving economic growth through new and more sustainable sources of energy is identified as the absolute priority.

The contribution from energy to the broader economic growth is identified as the number one challenge.

The reduction of the environmental impact of energy and the diversification of the energy mix comes second.

The rising role of analytics in helping the industry become more efficient is recognized but less prominent in energy respondents’ opinion.

Technical and medical innovation such as imaging devices and diagnosis tools are expected to drive progress the most in quality of healthcare.

This is the first driver identified by Healthcare industry respondents.

Scientific innovation and especially applied genetic science to diagnostic are also very high in the ranking.

Policy innovation (awareness campaigns, early detection of diseases) is also expected to play a leading role.
Energy – priorities to tackle within 5 years

E1. What are the main challenges the energy industry will have to face in the next five years?  
Base: Global results N= 340*  *Question asked only to executives from the energy sector
Healthcare – what will drive progress in quality of healthcare in next five years

IN THE NEXT FIVE YEARS, WHAT WILL DRIVE THE MOST PROGRESS IN THE QUALITY OF HEALTHCARE DELIVERED TO CITIZENS IN YOUR COUNTRY?

First most important driver

Summary 3 drivers

- Innovations in genomics and molecular medicine that can more precisely diagnose disease at the individual level
- New imaging devices, medical techniques or diagnosis tools
- Consumer awareness campaigns, screening and early detection of disease
- Making sure we train enough healthcare professionals and technicians with the right skills to meet local needs
- Home health solutions, the consumerization of healthcare and the rise of wearable health monitoring devices
- Re-thinking how healthcare systems are organized and managed to build more financially sustainable operating models
- A cultural shift away from a disease based model to the value of healthy life
- Redefining how the private healthcare sector and public authorities collaborate
- The digitization of healthcare; improving healthcare delivery via use of information technology / data
- New financial / reimbursement / incentive models
- The adoption by developed markets of solutions initially created to answer the resource constraints in emerging markets

None of these: 10%

H1. In the next five years, what do you think will drive the most progress in the quality of healthcare delivered to citizens in your country? Please select 3 options from the most important, to the second most important to the third most important driver.

Base: Global results N= 417* *Question asked only to executives from the healthcare sector
